Percentage: 92.7

•S.B.R.L. Academy, Mainpuri, Uttar Pradesh

High School (CBSE)

2018

Percentage: 93.6

EXPERIENCE

•CHEGG INC.

Subject expert, computer science

November 2022-December 2022

- Solved student's doubt on different domains of computer science

Remote

PERSONAL PROJECTS

•StoryVerse

(Individual Project)

Github

- Tools & technologies used: Node, Express, express-handlebars, passport, mongoDB
- The app allows anyone to publish their stories. The user can keep the story private or public, the user is allowed to see others public stories, he/she can also edit his/her story. There is also a option to view all the public stories of any user.

•Decentralized Voting Application on Ethereum

(Group Project)

- Tools & technologies used: Solidity , Smart Contracts, Metamask , Ethereum TestNet ,Web3.js
- A Decentralised-app which leverages the power of Blockchain to make a decentralised voting system with no central authority having control over the results of the Election. Used metamask and smart contracts over Ethereum Testnet to make it immutable and fully de- centralised.

•Parking System

(Individual Project)

Github

- Tools & technologies used: Java and Java Swing
- This desktop application allows the user to check for available parking slots, get the fare details whenever the user decides to unpark the car, it also gives a notification to user whenever parking deadline is near
